OLPH is a faith-based community committed to developing the whole child in thought, word, & action.

In 1937, four Sisters of the Sisters of Charity of the Blessed Virgin Mary arrived in Chattanooga, TN. Their goal was to see that “each child received splendid individual attention and made remarkable progress.”

Today, OLPH is a nurturing school environment that serves students beginning in PreK3 through the 8th grade. It is through Christ’s model as our first teacher that our faculty and staff find value and potential in each of our students. Our core values to Know, Love, and Serve the members of our school community are deeply ingrained in our thoughts, words and actions here at OLPH. Since our earliest days in 1937, it has been these ingredients that we believe help our students become confident, curious, and lifelong learners.

Laying the foundation for lifelong learners.

PreSchool and Kindergarten: Early Childhood at OLPH offers the opportunity to experience Art, Music, Physical Movement, Technology, and Spanish. Exploration and play are encouraged in our certified Nature Explore Outdoor Classroom. At OLPH, your child will begin to discover the joy of learning through the balance of independent exploration and small group instruction.

Elementary • Grades 1 - 5: Our elementary school builds on the excitement and love of learning established in our early childhood and begins to build a foundation that supports the confidence of our students. Character and faith lay the groundwork for decision making and relationship building to become real-world problem solvers.

Preparing future leaders.

Middle School • Grades 6-8: In a PreK-8 community, our Middle School students have the opportunity to exercise greater responsibility and autonomy in the school. Academically, our middle schoolers are challenged to reach higher standards in a supportive environment. Teachers work collaboratively to create meaningful assignments for students that promote critical thinking, creativity, collaboration, communication and citizenship..

Academic Excellence through a curriculum that promotes spiritual, intellectual, social and physical growth.

Challenging Academic Curriculum
